

# DuPont™ Zytel® 74G33W BK196

## NYLON RESIN

Product Information

Common features of Zytel® nylon resin include mechanical and physical properties such as high mechanical strength, excellent balance of stiffness and toughness, good high temperature performance, good electrical and flammability properties, good abrasion and chemical resistance. In addition, Zytel® nylon resins are available in different modified and reinforced grades to create a wide range of products with tailored properties for specific processes and end-uses. Zytel® nylon resin, including most flame retardant grades, offer the ability to be coloured.

The good melt stability of Zytel® nylon resin normally enables the recycling of properly handled production waste. If recycling is not possible, DuPont recommends, as the preferred option, incineration with energy recovery (-31kJ/g of base polymer) in appropriately equipped installations. For disposal, local regulations have to be observed.

Zytel® nylon resin typically is used in demanding applications in the automotive, furniture, domestic appliances, sporting goods and construction industry.

**Zytel® 74G33W BK196 is a high gloss automotive weatherable black 33% glass reinforced nylon 66 and nylon 6 comelt resin.**

| General information                         | Value           | Unit                 | Test Standard   |
|---|-----------------|----------------------|-----------------|
| Resin Identification                        | PA66+PA6-GF33   | -                    | ISO 1043        |
| Part Marking Code                           | PA66+PA6-GF33   | -                    | ISO 11469       |
| Rheological properties                      | dry / cond      | Unit                 | Test Standard   |
| Molding shrinkage, parallel                 | 0.1 / -         | %                    | ISO 294-4, 2577 |
